

TEDDY LAI, Architect AIBC, MRAIC, CP
CURRICULUM VITAE

With experience in Building Code consulting and Fire Sciences, Teddy Lai has developed specialized expertise in the application of Building Codes and creation of alternative approaches (equivalents) to meeting the Building Code intent on a performance basis. Teddy has also developed specialist expertise in Code provisions for persons with disabilities (barrier free provisions); stairs, ramps, guards, and handrail safety; and other such ergonomic aspects of Code requirements. This is supplemented by an architectural design, field review, and coordination experience. Teddy has also provided, for legal purposes, expert opinions on issues relating to stair safety, slips and falls, and provisions for persons with disabilities.

SPECIALIZED EXPERTISE

- Provisions for persons with disabilities
- Ergonomic aspects of fire and life safety
- Fall hazard protection
- Expert opinions on slips and falls
